

Amendments to the Claims:

Claim 1 (currently amended) A modular sign comprising: a base; a vertical support member releasably secured to the base; a lower horizontal member having first and second ends; first and second upreaching members connected to the first and second lower horizontal member ends; an upper horizontal member having first and second ends, the upper horizontal member first end connecting with the first upreaching member and the upper horizontal member second end connecting with the second upreaching member; a display member positioned between the first and second upreaching members and below the upper horizontal member; and movable connectors joining the display member to the upper horizontal member.

Claim 2 (original) A modular sign comprising: a base; a support member secured to the base; a first horizontal member secured to the support member; at least one upreaching member connected to the first horizontal member; an upper horizontal member secured to the at least one upreaching member; a display member position proximate the at least one upreaching member and below the upper horizontal member; and at least one connector joining the display member to the upper horizontal member.

Claim 3 (original) A modular sign as claimed in claim 1 wherein the movable connectors are ring connectors.

Claim 4 (original) A modular sign as claimed in claim 2 wherein the at least one connector is a ring connector.

Claim 5 (original) A modular sign as claimed in claim 1 wherein the display member has first and second sign faces.

Claim 6 (original) A modular sign as claimed in claim 2 wherein the display member has first and second sign faces.

Claim 7 (original) A modular sign as claimed in claim 3 wherein the display member has first and second sign faces.

Claim 8 (original) A modular sign as claimed in claim 4 wherein the display member has first and second sign faces.
